

Gurry : the 'Cryptohorse' race gambling application

What is Gurry?

Gurry is a mobile application whose objective is to create digital Cryptohorse races to protest against the animal abuse in real horse races.

What is a CryptoHorse?

A Cryptohorse is a playable object which is built from a blockchain seed using hashes. The seed is a bytechain which will be parsed to define each characteristic of the horse:

- Color
- Figure
- Light
- Nationality
- Rating
- ...

It will be the DNA of the cryptoHorse

Application activities

- Log in / Log out.
- Register.
- View your profile with all the data related to your user.
- Buy and sell the cryptohorse.
- Create Horse Races.
- Join to Horse races.

Demo

As this project could be too much work for the subject, the demo version will have:

- Users with a wallet of money.
- Races creation system with random defined horses.
- Bet system.
